Key Points

Today

- Slight risk of severe storms over E NM and W TX this afternoon/evening; damaging wind gusts, large hail and an isolated tornado possible
- Elevated fire weather conditions over SE NM/W TX today.

Wednesday - Saturday

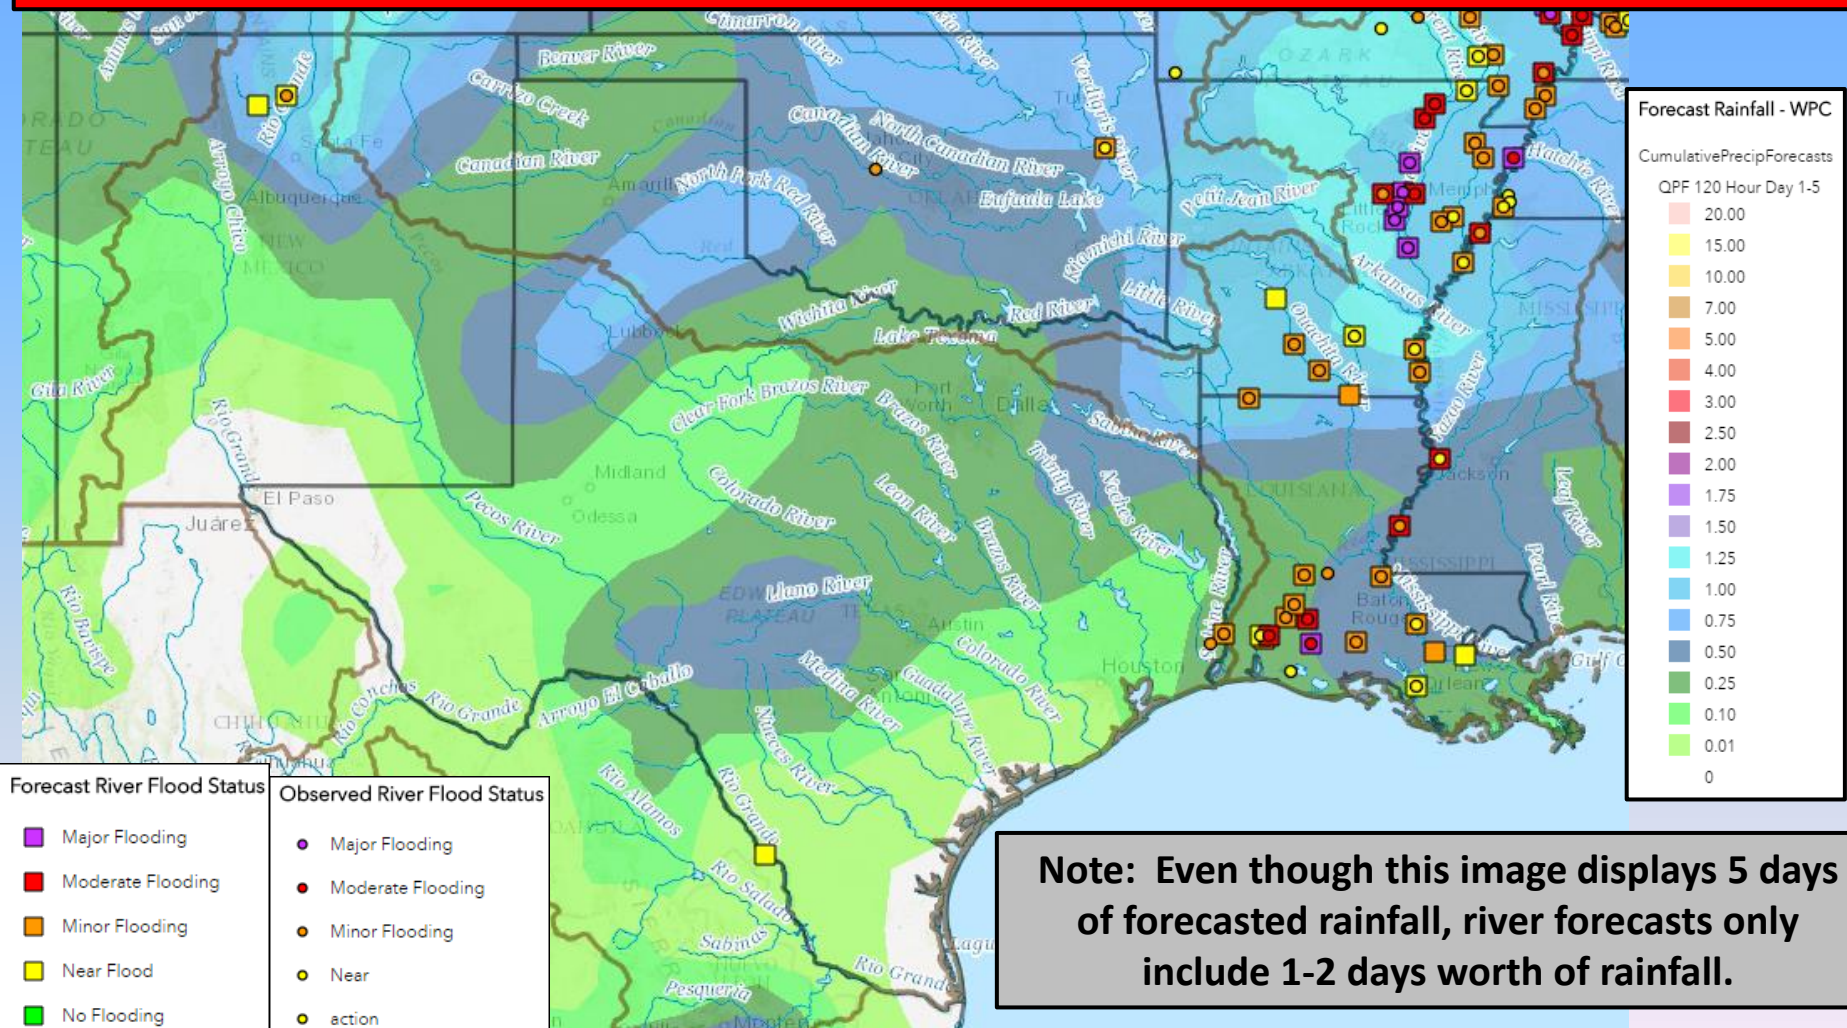

- Slight risk of severe storms over the eastern Panhandles and W/NW OK; storms will be ongoing throughout the day and may contain gusty winds, large hail and an isolated tornado
- Slight risk of severe storms continues Thursday over SE OK, NE TX, AR and N LA
- Storms likely remain over LA on Friday, could see a few strong storms

River Flooding

- Major flooding will continue on the White River (NE AR) this week
- Moderate to major flooding occurring in SW LA and likely to continue
- Minor to moderate flooding is expected along the MS River over the next week

5-Day Precipitation Forecast & River Flood Status

- Major flooding will continue on the White River in NE AR throughout this week
- Moderate to major flooding occurring in SW LA will likely to continue for much of this week
- Minor to moderate flooding is expected along the MS River over the next week

Today's Weather

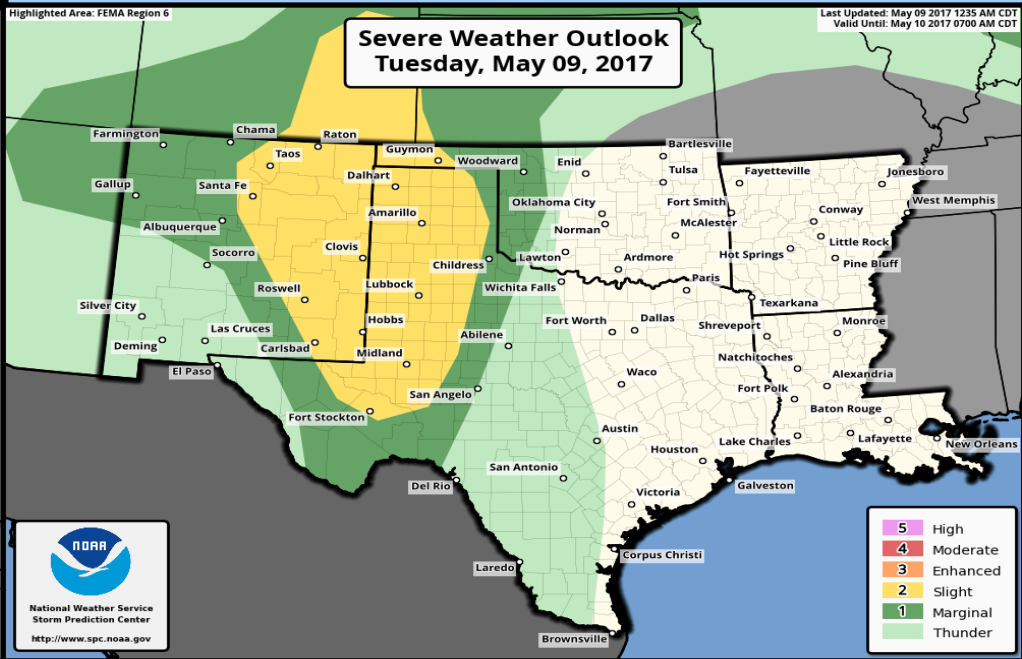

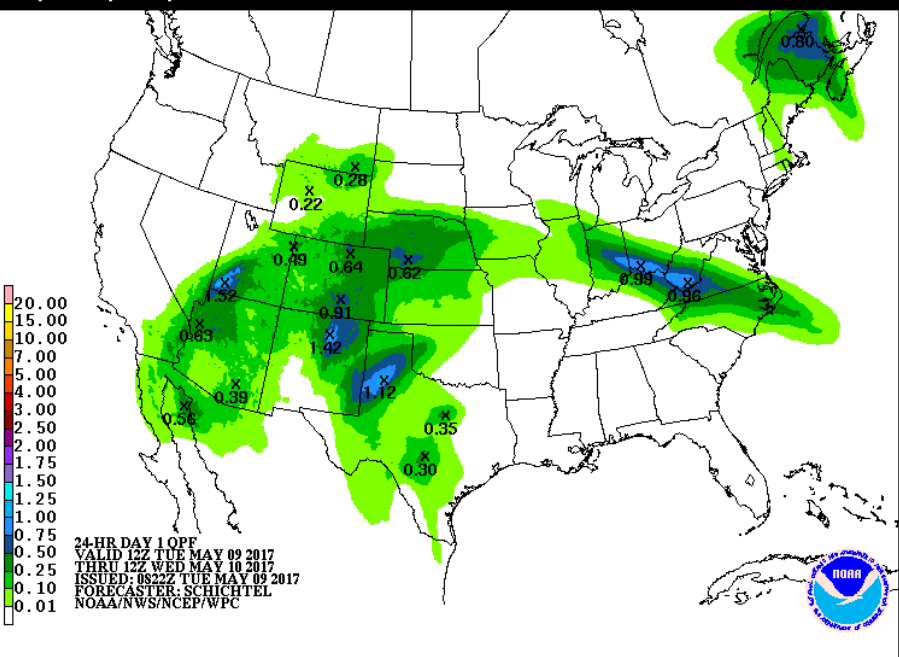

Moderate to major river flooding continues over NE AR & SW LA.

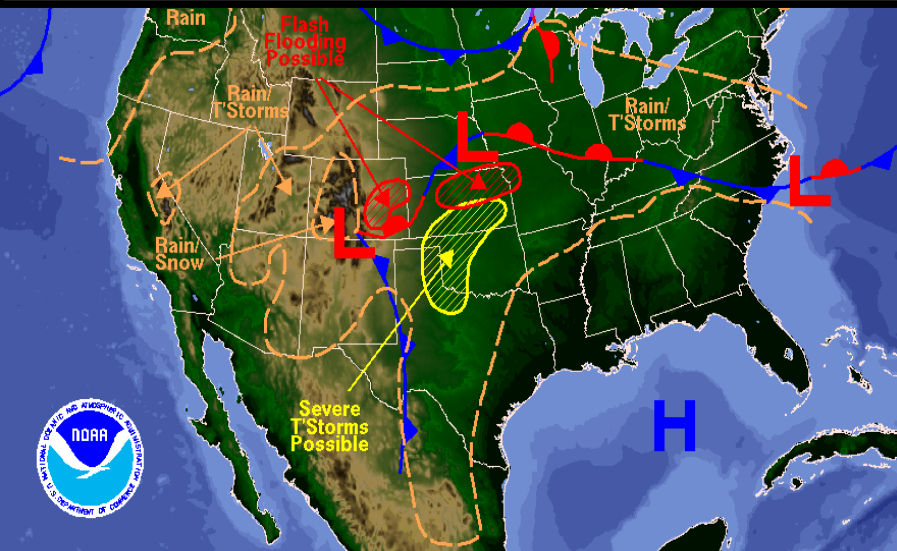

Slight risk of severe storms over SE NM and W TX this afternoon/evening; damaging wind gusts, large hail and an isolated tornado possible.

Elevated fire weather conditions today across SE NM into far W TX.

Weather Forecast for Tue, May 09, 2017, issued 4:21 AM EDT
DOC/NOAA/NWS/NCEP/Weather Prediction Center
Prepared by McCreynolds based on WPC, SPC and NHC forecasts

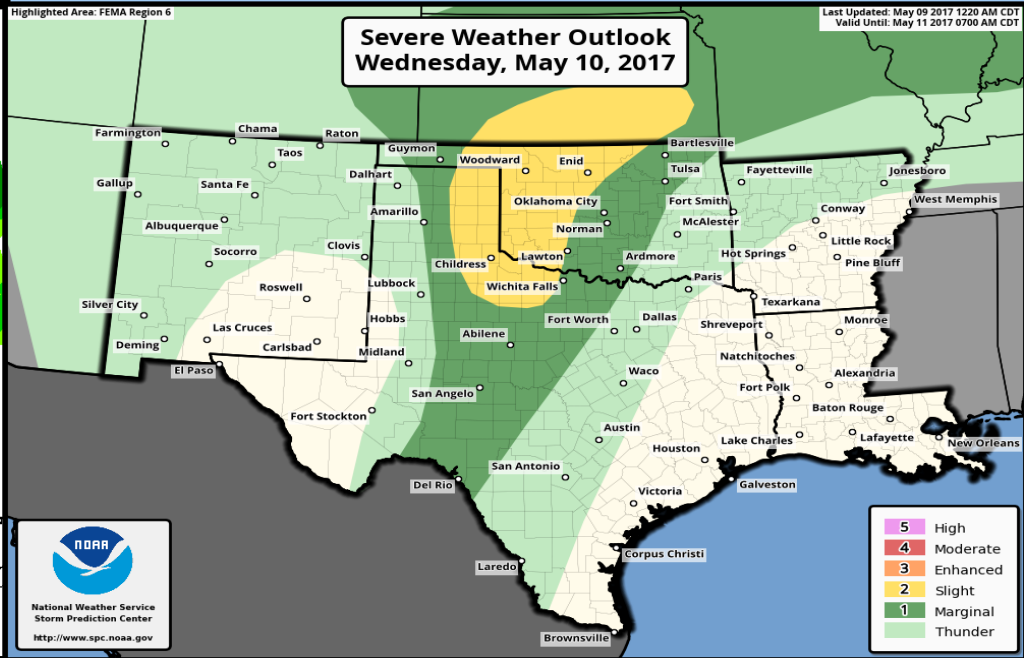

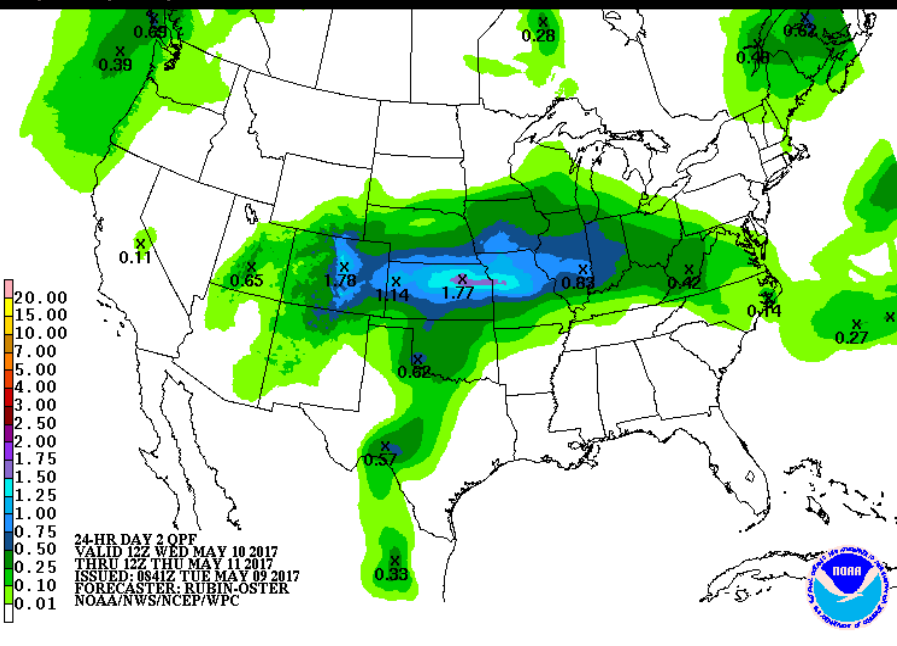

Tomorrow's Weather

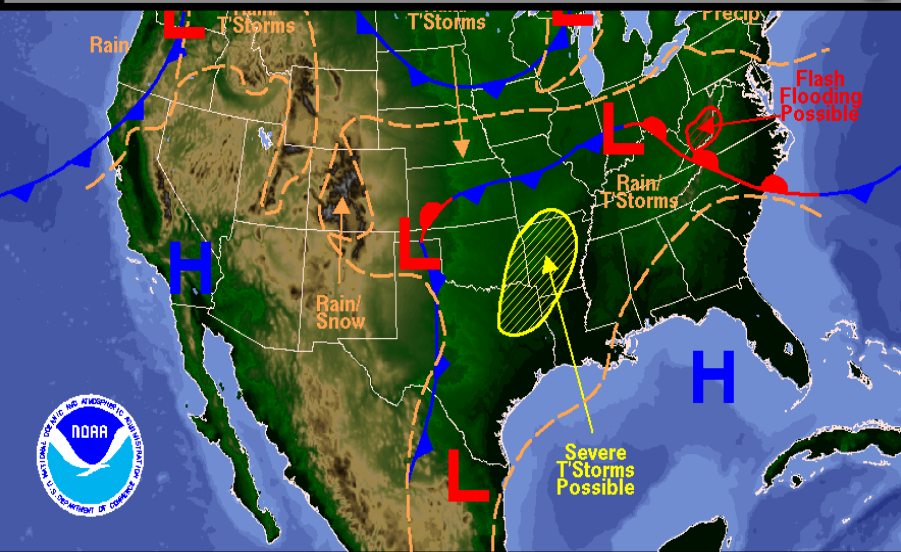

Moderate to major river flooding continues over NE AR & SW LA.

Slight risk of severe storms over the eastern Panhandles and W/NW OK. Storms will be ongoing throughout the day. Large hail and wind gusts possible in the morning, and there may also be a chance of large hail, damaging winds as well as an isolated tornado in the afternoon/evening.

Weather Forecast for Wed, May 10, 2017, issued 4:40 AM EDT Tue, May 09, 2017
DOC/NOAA/NWS/NCEP/Weather Prediction Center
Prepared by McCreynolds based on WPC, SPC and NHC forecasts

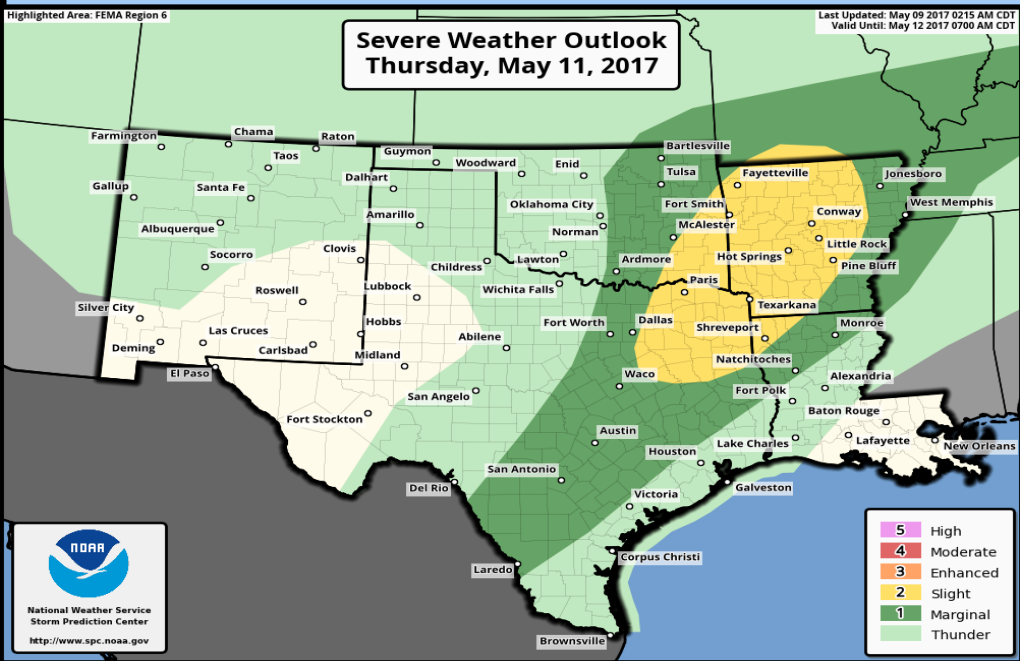

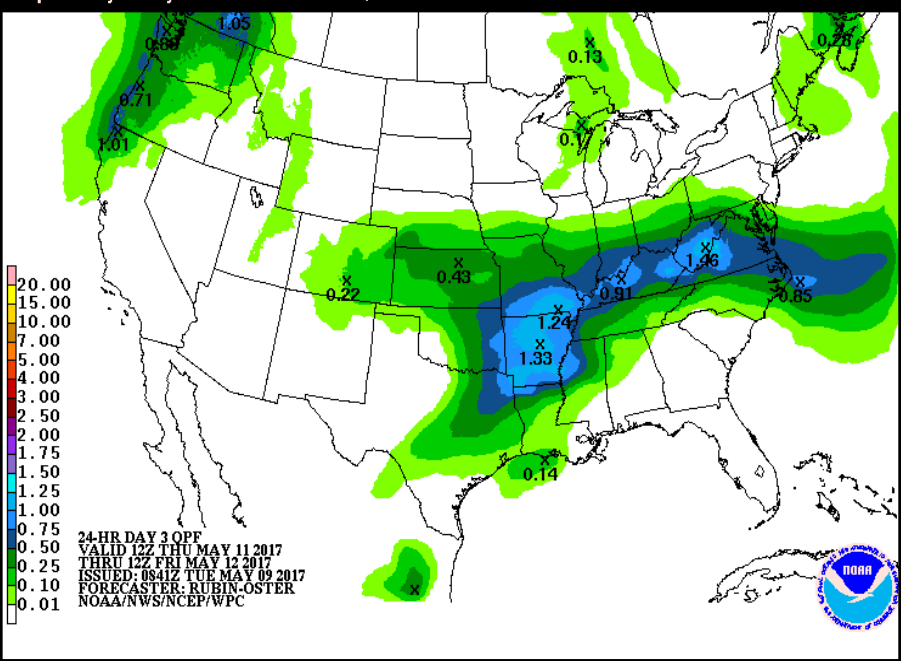

Thursday's Weather

Moderate to major river flooding continues over NE AR & SW LA.

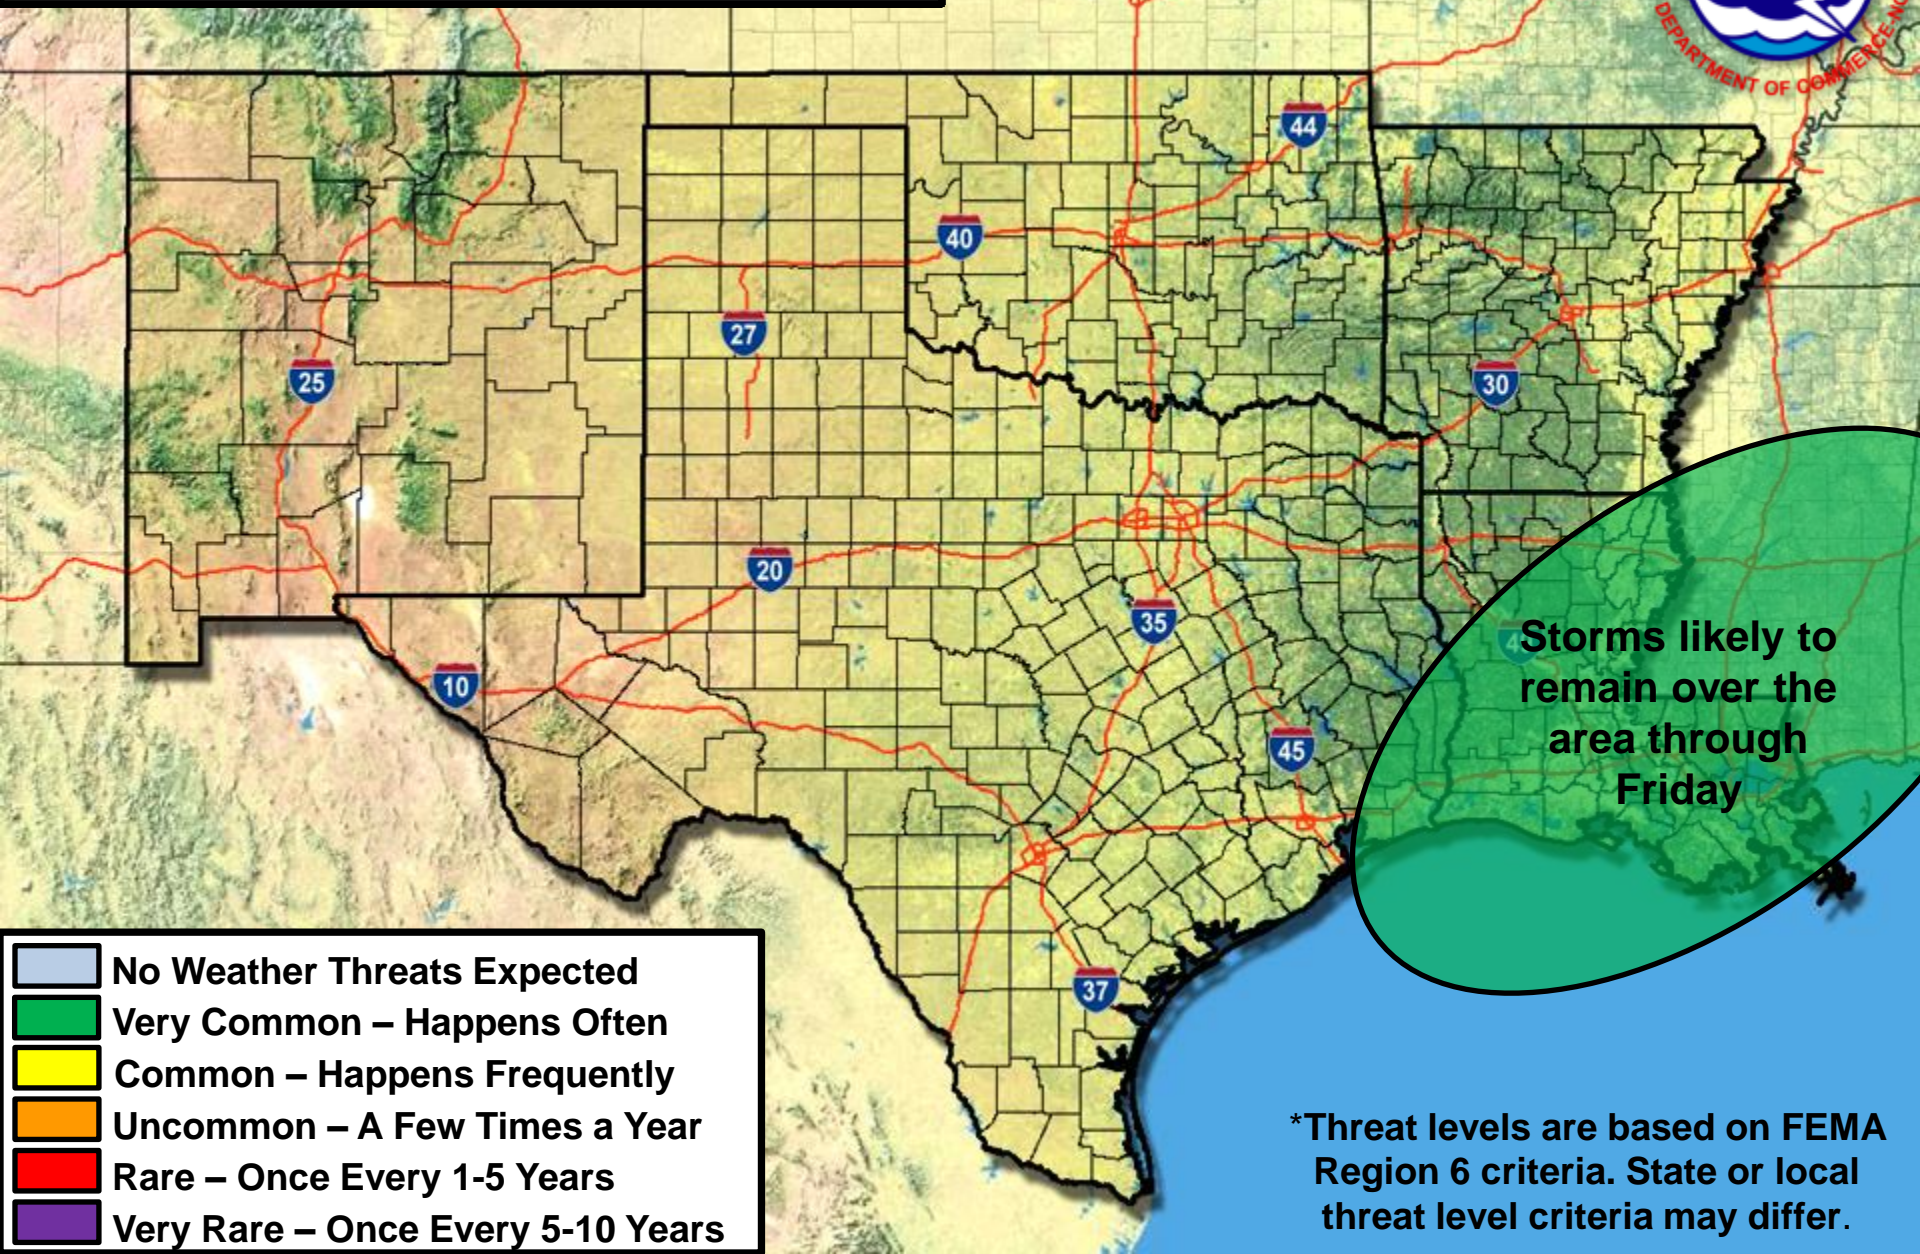

Slight risk of severe storms over SE OK, AR, NE TX and N LA. Damaging winds will be the main threat, storms may continue into the overnight hours.

Weather Forecast for Thu, May 11, 2017, issued 4:52 AM EDT Tue, May 09, 2017
DOC/NOAA/NWS/NCEP/Weather Prediction Center
Prepared by McCreynolds based on WPC, SPC and NHC forecasts

Day 4-5 Weather Hazards

Valid: 0800 Fri - 0800 Sun

Storms likely to remain over the area through Friday

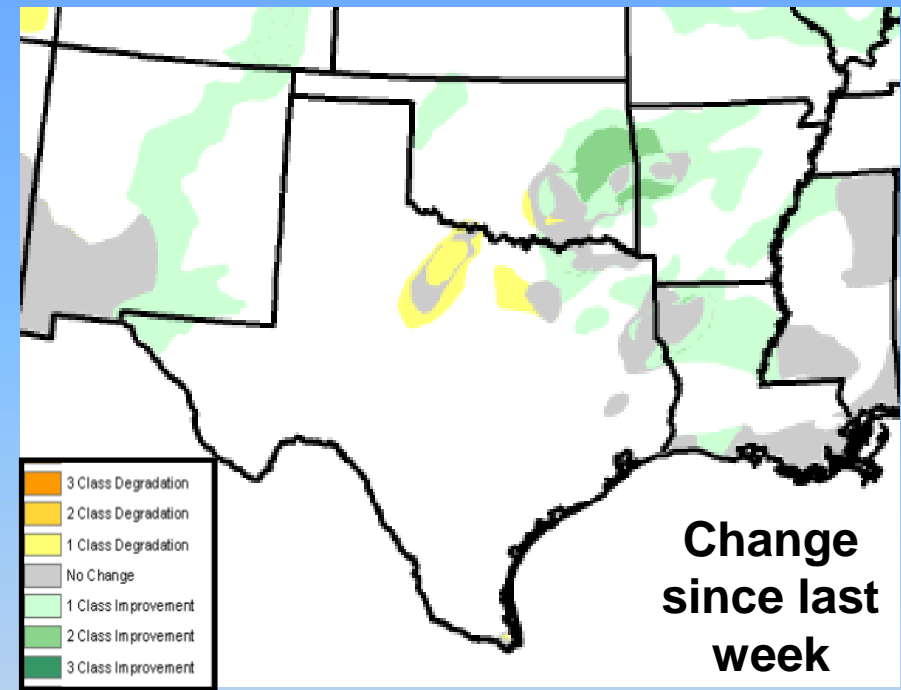

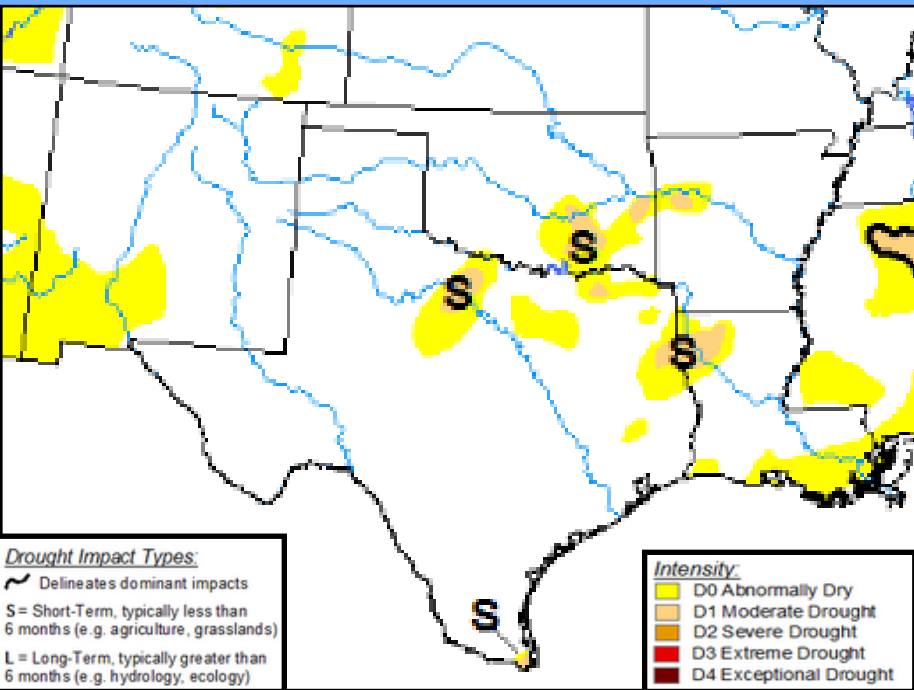

- No Weather Threats Expected
- Very Common – Happens Often
- Common – Happens Frequently
- Uncommon – A Few Times a Year
- Rare – Once Every 1-5 Years
- Very Rare – Once Every 5-10 Years

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Drought Monitor Released May 4th, 2017

Data valid as of 7am CST, Tuesday, May 2nd, 2017

The criteria for the color codes in our briefings is below, please provide any feedback to sr-srh.roc@noaa.gov.

Weather "Threat" Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
